

**Hillside-Catholic Charities
Finger Lakes Region Behavioral
Health Care Collaborative (BHCC)**

BHCC Vision

Achieving Our Shared Vision

- Build a robust behavioral health network rooted in best practices with excellent client outcomes that can confidently take risk to deliver greater value from the collaborative whole than from the sum of its individual parts.

BHCC Mission

Mission

- To build a network of providers spanning the mental health and substance use treatment systems (behavioral health), physical health, and social determinants space that can demonstrate through data collection and analytics that we deliver improved outcomes in aggregate for clients engaged at any point across the collaborative.
- To improve the overall health of the population we collectively serve, through prevention and treatment, including children, adults, and families, with a particular focus on underserved geographies.
- To partner with the population we serve to improve their experience and satisfaction with the healthcare system.
- To empower each provider in their strengths and expertise and learn from one another.
- To leverage our combined expertise and resources to create true integration opportunities for behavioral health, social determinants of health, and medical services.
- To successfully advocate for the network and our clients with MCOs, New York State, and the broader health care community.
- To build collective competency in value-based payment arrangements.

BHCC Key Goals & Objectives

Key Goals & Objectives

- Educate the network about value based payment.
- Work with Fidelis early in the planning process to clearly understand expectations and requirements for efficient and effective VBP contracting.
- Develop a value based payment value proposition
- Establish outcome metrics and financial risk thresholds through data collection and analytics.
- Determine and prioritize how to spend the funds to strengthen the whole toward the mission and enable each agency to successfully participate in Level 2 or higher VBP contracts.
- Enable development and deployment of technical support for VBP infrastructure and innovation.
